

Introducing....

Nanosil Spray Gel is a revolutionary silver-based drug free antimicrobial spray that is 200% to 300% more effective than other silver-based products due to nanotechnology and its proprietary manufacturing technique.

Nanosil Spray Gel : Features and Benefits:

- *Kills Bacteria 200% to 300% more effectively than other silver-based products*
- *Kills over 650 Bacteria; including MRSA.*
- *Aids in Wound Healing and Tissue Repair; Reduces the Risk of Scarring*
- *Regenerates Cells; Accelerates Healing; Reduces Pain*
- *Easy to apply; quickly forms into a gel on the skin.*
- *Kills Staphylococcus and Pseudomonas Aeruginosa*
- *Kills and Inhibits Yeast Growth; kills Fungi.*
- *Contains lower silver concentration than other silver-based products; therefore NO Staining.*

❖ Bacteria cannot mutate against Nanosil Spray Gel!

Use Nanosil Spray Gel to treat infection and promote fast healing for all types of wounds, burns, decubitus ulcers, pressure ulcers, diabetic ulcers, bed sores, post-op surgical incisions, lacerations, abrasions, skin tears, cuts, scrapes; even staph!

Nanosil Spray Gel Kills MRSA!

Nanosil™ Spray Gel kills MRSA!*

Nanosil™ Spray Gel is a revolutionary silver anti-microbial spray gel for the treatment of conditions affecting the soft tissue such as burns, radiation burns, decubitus ulcers, pressure ulcers, diabetic ulcers, wounds, lacerations, post-op surgical incisions, cuts and scrapes.

Nanosil™ Spray Gel contains nano-particles of pure silver that has been proven to be 200% to 300% more effective than other silver-based products in Independent Laboratory testing. Nanosil™ Spray Gel uses nano-technology and a proprietary manufacturing technique that allows the oligo-dynamic silver ions to be introduced directly to the wound site by a hydrosol spray gel delivery system that is simple to use and pain free; requiring no manual spreading of the gel onto the wound site.

Nanosil™ Spray Gel is delivered in a novel organogel compound with an unequal degree of sheer thinning and the reformation of a non-elastic, highly thixotropic gel; allowing for an improved penetration of the sub-dermal soft tissue. Nanosil™ Spray Gel forms a protective matrix at the wound site that lasts for hours.

**Use Nanosil™ Spray Gel to treat infection and promote fast healing
for all types of wounds, burns, decubitus ulcers, diabetic sores, abrasions, cuts, scrapes; even staph!**

*Results from Independent Laboratory Testing; data available upon request.
